1. Which core component of XAMPP is responsible for storing and managing data for websites? [1]
A) Apache B) PHP C) MySQL D) Perl

2. What is the voltage level for a HIGH state signal in digital pins on the Arduino Uno board? [1]
A) 0V B) 5V C) 3.3V D) 1.5V

3. When using UART serial communication on the Arduino Uno, which Arduino pin should be connected to the TX pin of another device? [1]
A) Pin TX B) Pin RX C) Any digital pin D) Any analog pin

4. In Arduino, what is the function called that contains the main code and runs continuously after the initial setup? Give an example code for blinking an LED. [3]

5. In Arduino programming, explain the function of the `Serial.begin(9600)` command. [3]

6. Describe what is the main difference of Raspberry Pi with other micro-controllers? [3]

7. Outline three key technical features of the ESP32 that make it ideal for IoT devices. [3]
